Edge
Solutions**

Systems Engineering

Information Technology (IT) problems typically have complex, multi-faceted solutions. For example, the need to support an organization with collaboration has *Systems Architecture, Software Engineering, Systems Administration, Systems Integration, Security and Technical Support* requirements. Triune supports IT projects from software to server room to end-user for some of the largest organizations in the world..

Our experience includes:

- ◆ Systems Architecture
- ◆ Software Engineering
- ◆ Technical Support

Knowledge Management

Triune delivers industry leading and award winning custom-developed services to enhance organizations' capabilities in the areas of knowledge management and collaboration. Triune's work with Air Force Knowledge Management has been recognized by both the American Productivity and Quality Center (APQC) and eGov as a Knowledge Management best practice.

Our KM service includes:

- ◆ KM Methodology
- ◆ KM Maturity Model
- ◆ Knowledge Retention & Transfer

SharePoint Consulting

Triune provides SharePoint migration and development services, including planning and execution of strategies for migration of users, organizational data, and capabilities to SharePoint from other technology platforms, development of customized functional capabilities within the SharePoint environment, and training and extended user support for users new to the SharePoint environment.

Our service includes:

- ◆ Planning & Implementation
- ◆ Migration
- ◆ Custom Module Development

KnowledgeNow Software

The KnowledgeNow (KN) Application enables knowledge-workers to share tacit knowledge and explicit content across any network or geographic boundary. KN uses a Virtual Workspace model to empower people to interact, collaborate, and find knowledge resources.

Our software includes:

- ◆ Enterprise Collaboration
- ◆ Feature Rich Modules
- ◆ Secure, Robust, Scalable
